SUMMARY

Full Stack Software Engineer with 5+ years of experience building SaaS platforms, ERP systems, and scalable web applications using TypeScript, React, Node.js, Express, Prisma, and MongoDB. Built multiple production applications including OneSplash, a multi-tenant SaaS platform currently serving active businesses.

EXPERIENCE

Software Engineer

OneSplash

📅 12/2025 - Present 📍 Lagos, Nigeria

- Architected and independently built a production-grade multi-tenant SaaS platform using TypeScript, React, Node.js, Express, Prisma, and MongoDB.
- Developed ERP modules including Inventory, CRM, POS, Finance, Analytics, Logistics, and SEO-optimized storefronts.
- Designed secure multi-tenant REST APIs with authentication, RBAC, AI-powered onboarding, and payment integrations (Paystack & Stripe).
- Deployed and maintained the platform using Vercel, Render, MongoDB, and S3-compatible object storage.
- Onboarded 10 businesses, with 5 actively using the platform and processing live transactions.

Software Engineer

Tech HQ (Remote)

📅 06/2024 - 01/2026 📍 Abuja, Nigeria

- Engineered ADC CloudBook, a cloud-based ERP platform using the PERN stack for accounting, inventory, and business management.
- Engineered ASO CENTRAL NEWS, a production news platform using the MERN stack with React Router SSR and technical SEO.
- Implemented REST APIs, responsive interfaces, and scalable application architecture for production systems.
- Optimized technical SEO, contributing to 10,000+ monthly Google impressions and approximately 200 organic clicks per month.
- Collaborated remotely to deliver production-ready features and maintain enterprise applications.

PROJECTS

OneSplash

TypeScript, React, React Router v7, Node.js, Express, Prisma, MongoDB, TurboRepo, Paystack, Stripe, Shadcn UI

🔗 <https://onesplash.app>
